

## Hose Reel Drives

- We manufacture connecting solutions between Hydraulic Power Packs and Hydraulic Equipment.
- Step-less revolutions of hose so that hose can be wound and unwound automatically with the push of a lever on Power pack.
- These are available in various options of hose lengths and number of hose connections. Reel drive systems can be used for any equipment that requires Hydraulic flow at a remote location for operating equipment.

### Technical Specifications:

Size Range: 175 m x 6, 250 m x 4; 500 m x 2

Pressure Range: Upto 400 Bar

Rotation: Bi-Directional

Rotary Drive: Hydraulically actuated with controlled brake system

Hydraulic Hoses: Parker/ Gates
